

# Computer Comfort

The Friendly Computer Experts

Since 1986, Computer Comfort has offered fast, friendly, and comfortable computer and network solutions to businesses.

Our technicians ensure that you understand exactly what your computer issues are and the solution we implement – without confusing IT techno-speak.

Unlike expensive boutique IT consulting firms, working with small businesses is our specialty.

## Service & Repair

Computer Comfort makes day-to-day service and repair easy, so your network, workstations and your business can keep running. We provide a complete range of services, ready at a moment's notice, either in our shop or on-site. If you're interested in knowing the status of your entire network, call us for a Free Network Audit (see below). It's a great way to prioritize your service needs.

Computer Comfort's Service and Repair options:

- **Wireless networks** – Expert installations ensure you're free to roam while your data stays secure.
- **Field/On-site service** – An IT staff at your disposal to fix problems with minimal interruption to your day.
- **Shop/In-house services** – An affordable option when you don't need it fixed same-day. Our repair center diagnoses and solves the toughest technical issues.
- **Remote access** – We deliver the ultimate promise of technology...working from anywhere.
- **Business to Home services** – Our specialty. A secure connection to your desktop at work while sitting on your sofa.
- **Laser printer repair** – With care, printers last a long time. We fix smudging, jamming paper and other problems on-site or in our shop.
- **Post-disaster recovery and restoration** – Floods, fires and other disasters don't necessarily mean the end of your data. Ask us first if it can be saved.
  - **Installations** – Installing hardware and software can create computer conflicts. We ensure new technology works seamlessly with your existing system.
- **Upgrades** – Extend the life of your system with upgrades rather than all new computers.
- **Hardware** – Don't overpay for off-the-shelf. We custom build guaranteed systems that do what you want today, with room to grow for tomorrow.
- **Software** – Our installation experts prevent conflicts with your other software, saving you money down the road.
- **(LAN) local area network** – Share resources such as printers, Internet access and hard drives. We install, maintain and administer complete LANs, affordably.
- **(WAN) wide area network and VPN connections** – For multiple offices, our experts create secure networks so all offices work as one.
- **Cabling** – We run any type of cable throughout your office, and service it so you'll always know it's running perfectly.
- **Microsoft services** – Our Microsoft Certified Technicians diagnose and repair all Microsoft-related issues.
- **Emergency response** – 24/7, a Computer Comfort technician is ready for any problem.
- **Data Recovery Services** – Hard drive failures are common. Often your data can be saved if the right steps are taken. Call us as soon as you detect a problem.

## Call Today to Schedule Your Free Computer Comfort Network Audit

Get a Network Report Card on your business computer network by calling today to schedule your appointment. We will analyze your entire network and provide you with an instant, detailed report on your system, as well as steps to consider to protect your system and data. There is no obligation to act upon our recommendation, but if you approve, we'll show you a plan to implement a customized solution for your company.

**Call for an appointment today, 1-800-948-0201**
